

“After making the decision 5 years ago to purchase a digital X-ray processor I looked at several companies to supply the equipment but settled on Celtic SMR and their Agfa CX 30 and have never regretted that decision. The installation was straightforward and the quality of our images is second to none. The staff at Celtic SMR are always very friendly and helpful and when it came to moving to our new premises recently they transported and installed all my X-ray equipment for me”.

“I have to say that in the last 5 years the only visits which I have needed have been for routine servicing and so have experienced no down time with my machine at all. If I had to make the decision again I would certainly choose Celtic SMR.”

Ruth Mackay, BVM&Sc MRCVS
